- Lightweight and resilient valves
- Various mechanical actuating controls
- panel installation

Series AP - inch

Qn = [[150 ... 250] l/min]

Technical data Industry Activation Valve type Plate connection Actuating element

Compressed air connection type Compressed air connection input Compressed air connection output Compressed air connection, exhaust Nominal flow Qn Min. working pressure Max. working pressure Min. ambient temperature Max. ambient temperature Max. ambient temperature Min. medium temperature Max. medium temperature Max. medium temperature Max. medium temperature Medium

3/2-directional valve, Series AP

0820400005

Max. oil content of compressed air Max. particle size	5 mg/m³ 5 μm
Weight	0.27 kg
Material	
Housing material	Aluminum
Seal material	Acrylonitrile butadiene rubber
Material actuating control	Steel, chrome-plated Polyamide
Part No.	0820400005

Technical information

Sound pressure level measured at 6 bar at 1 m distance

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

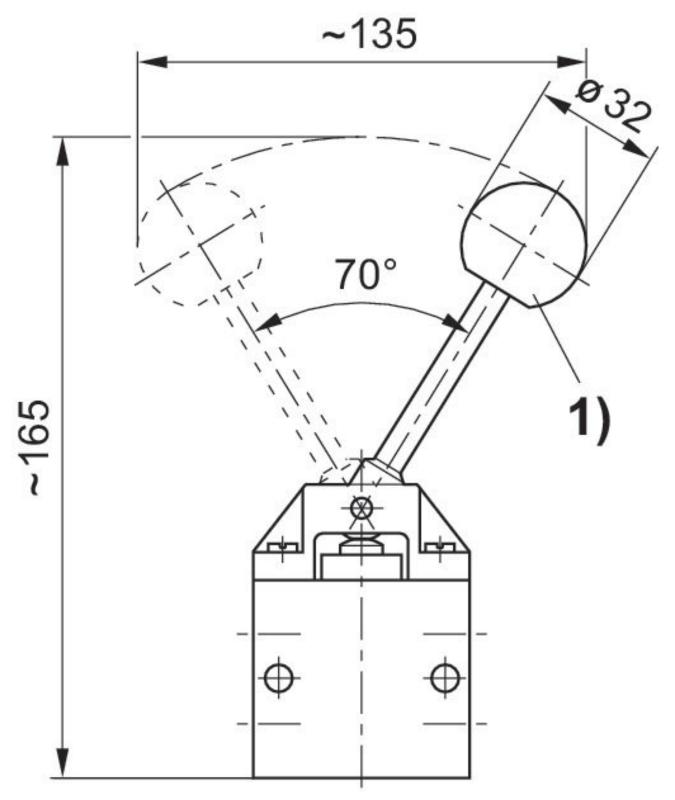

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

3/2-directional valve, Series AP

0820400005

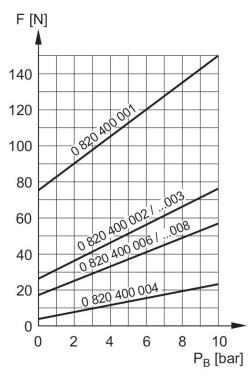

Dimensions

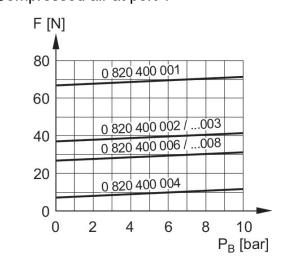

actuating torque: 40 Ncm 1) Ball

Compressed air at port 3

Actuating force+ Compressed air at port 1

F = actuating force P_B = Working pressure
