Series PR1 2024-01-25

Series PR1

The AVENTICS Series PR1/PR2 is designed for applications that demand fast responses to the slightest fluctuation in compressed air. They can be adjusted precisely and are an alternative to electronic pressure regulators. Precision pressure regulators are used to achieve extremely accurate pressure control independent from the pilot pressure and the flow rate. They offer high performance and flexibility, combined with increased reliability.

Industrial Precision filter pressure regulator Metal reservoir without window G 1/4 750 l/min 10 µm Manual 0.2 bar 16 bar -10 °C 60 °C 0.2 bar 5 bar 1-part single vertical Diaphragm-type pressure regulator with relieving air exhaust 0.01 l/min

0821300411					
Filter element	exchangeable				
Filter reservoir volume	11.5 cm ³				
Medium	Compressed air				
	Neutral gases				
Max. particle size	5 µm				
Weight	0.975 kg				
Material					
Housing material	Die cast zinc				
Seal material	Acrylonitrile butadiene rubber				
Material reservoir	Die cast zinc				
Material filter insert	Polyethylene				
Part No.	0821300411				

Technical information

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

Nominal flow Qn with secondary pressure p2 = 6 bar at $\Delta p = 1$ bar

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

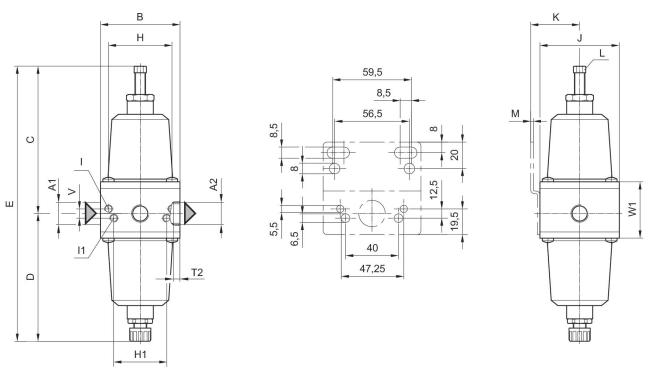

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).
