

AVENTICS Series SH

The AVENTICS Series GPC is distinguished by high side load capacity and torsion protection. The drive and guide rods are robust and precise with high torque and transverse force absorption.

Technical data

Industry	Industrial
Piston Ø	12 mm
Piston rod Ø	6 mm
Stroke	150 mm
Functional principle	Double-acting
Bearing type	Plain bearing
Magnetic piston	with magnetic piston
Cushioning	elastic
Min. working pressure	2 bar
Max. working pressure	8 bar
Min. ambient temperature	-10 °C
Min. ambient temperature	14 °F
Max. ambient temperature	70 °C
Max. ambient temperature	158 °F
Min. oil content of compressed air	0 mg/m ³
Max. oil content of compressed air	5 mg/m ³
Port	M5
Retracting piston force	53 N
Retracting piston force	11.91 lbf

Guide cylinders, Series GPC-BV

Extracting piston force	71 N
Extracting piston force	15.96 lbf
Max. speed	0.5 m/s
Impact energy	0.1 J
Medium	Compressed air
Max. particle size	50 µm
Pressure for determining piston forces	6,3 bar
Weight	0.97 kg

Material

Housing material	Aluminum
Surface housing	anodized
Seal material	Polyurethane
Material front plate	Steel, chrome-plated
Surface front plate	galvanized
Material guide rods	Stainless Steel
Bearing material	Sintered bronze
Material piston rod	Stainless Steel
Part No.	0822060029

Technical information

Note: Only the Ø10 variants fits to sensor series ST4. The sensor series ST6 and SN3 can be used for all other Ø variants.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in <https://www.emerson.com/en-us/support>).

S = stroke
To determine the cylinder length (ZA) for intermediate strokes (i.e. stroke 10 with dia. 40), the next available standard stroke size must be used

1) Through hole with thread
2) through-hole
Two holes C-C 10 mm.

Permissible static side load F [N] at distance L

Permissible static moment M [Nm]

Permissible static side force F [N]

Permissible static moment M [Nm]

GPC combinations

Overview drawing

1) $\leq \text{Ø}12$ mm (GPC-BV, GPC-E, GPC-TL)

2) Only for $\text{Ø}10$ mm (GPC-BV) and all Ø (GPC-ST)

NOTE: This overview drawing is only for orientation to indicate where the various accessory parts can be fastened to the cylinder. The illustration has been simplified for this purpose. It is thus not possible to derive the dimensions from this overview.
