AVENTICS Series RAK Rotary wing drives

The AVENTICS Series RAK is an efficient and easy way to generate torque from compressed air, in a very compact size. They are ideal for the compact applications in a wide range of industries such as, packaging, process, electronics etc.

Technical data

Industry	Industrial
Compressed air connection	G 1/4
Rotary compact module version	Rotary wing drive, double-acting
axis geometry	single
Frame size	RAK - 7D
Type	Double vane
Axis diameter	17 mm 17 mm 25 mm
Theoretical torque at	6 bar
Min. swivel times	0.12 s
Maximum operating frequency	120
Interior volume	127 cm ³
Max. permissible axial bearing load	88.2 N
Radial shaft load	1176 N
Theoretical torque	42 Nm
Permissible kinetic energy	0.225 J
Repetitive precision	3 °
Max. angle of rotation	90 °
Min. working pressure	2 bar

Max. working pressure	10 bar
Min. ambient temperature	5 °C
Max. ambient temperature	60 °C
Min. medium temperature	5 °C
Max. medium temperature	60 °C
Medium	Compressed air
Min. oil content of compressed air	0 mg/m ³
Max. oil content of compressed air	1 mg/m ³
Max. particle size	5 µm
Weight	2 kg

Material

Housing material	Aluminum
Surface housing	painted/powder-coated
Seal material	Acrylonitrile butadiene rubber
Material axis	Stainless Steel
Part No.	2705071100

Technical information

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the “Technical information” document (available in <https://www.emerson.com/en-us/support>).
