

Serie RDC

AVENTICS™

**Attuatori a membrana e a
pistone serie RDC AVENTICS**

EMERSON™

Serie RDC

La serie RDC AVENTICS è costituita da cilindri a membrana flessibile con basso attrito e può essere azionata a bassa pressione. I cilindri consentono un bilanciamento preciso delle forze, in particolari in sistemi di precisione.

- Ø 52,5 ... 115 mm
- A semplice effetto, asta arretrata senza pressione
- Ad attrito estremamente basso per regolazione della forza sensibile
