# 5/2-directional valve, Series 519

#### Series 519

The AVENTICS Series 519 is a line of air-operated minispool valves that are ideal for piloting pneumatic cylinders. The valves are suitable for automotive, case packing, packaging, and tire manufacturing applications.

#### **Technical information**

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

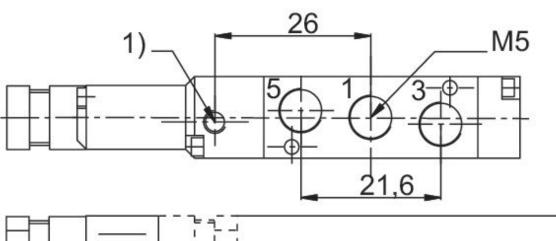

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).
