E/P pressure regulator, Series ED05 5610141500

Series ED05

The AVENTICS ED05 direct-acting pressure regulator ensures sensitive pressure control by combining digital control electronics with innovative proportional technology. The robust poppet valve technology, a large opening crosssection and the use of a soft-sealing valve seat make the valve highly resistant to contamination.

Technical data Control Control Function Actual output value Min. regulation range Max. regulation range Min. working pressure Max. working pressure Hysteresis Medium Nominal flow Qn Min. ambient temperature Max. ambient temperature Min. medium temperature Max. medium temperature Operational voltage DC Protection class Permissible ripple Max. particle size

Min. oil content of compressed air 0 mg/m³ Max. oil content of compressed air 1 mg/m³ Type Poppet valve $\alpha = 0.90^{\circ} \beta = 0.90^{\circ}$ Mounting orientation Certificates CE declaration of conformity Compressed air connection input G 1/4 G 1/4 Compressed air connection output G 1/4 Compressed air connection, exhaust Electrical connection type Plug Electrical connection size ISO 15217, form C Signal connection input and output Signal connection Plug Signal connection ISO 15217, form C 0 ... 20 mA Actual output value 0 ... 20 mA Nominal input value Industrial Industry Weight 1.1 kg

Material

Housing material

Seal material Part No.

Die-cast aluminum Steel, chrome-plated Hydrogenated acrylonitrile butadiene rubber 5610141500

Technical information

With oil-free, dry air, other installation positions are possible on request.

The protection class is only ensured when the plug is mounted properly. For detailed information, see operating instructions.

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

Dimensions

1) Core hole 15 mm deep for self-tapping screws M6

2) Universal threaded connection, suitable for G1/4 according to ISO 228/1:2000 and 1/4-27 NPTF

3) Through hole

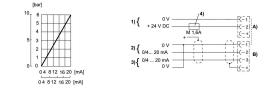

Pv = Supply pressure

Connect the plug via a shielded cable to ensure EMC

Characteristic and pin assignment for current control with actual output value

¹⁾ Operational voltage

2) Input current nominal value (ohmic load 100 Ω , max. 50 mA.) The voltage at the nominal input value may not exceed 12 V.

4) actual output value (max. total resistance of downstream devices < 300 Ω).

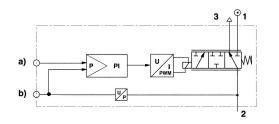

3) The operating voltage must be protected by an external M 1.6 A fuse. Connect plug 2 via a shielded cable to ensure EMC. A) Plug 1 B) Plug 2
