## Filter pressure regulator, Series 651 G651APBK1GA00HN

General series information AVENTICS Series 651 Air Preparation Units

The AVENTICS Series 651 is an easy-toinstall line of pneumatic filters, regulators and lubricators (FRLs) that offer the industry's highest flow rates and widest temperature ratings. Available in 1/8inch, and 1/4-inch port sizes, these FRLs are ideal for automotive and tire, packaging, food and beverage, and process applications requiring highly reliable operation and robust, modern-looking equipment.

#### **Technical data**

Industry Parts Reservoir Port Nominal flow Qn Filter porosity Condensate drain Pressure gauge Working pressure min. Working pressure max Min. ambient temperature Max. ambient temperature Certificates Regulation range min. Regulation range max. Industrial Filter pressure regulator Metal reservoir without window G 1/8 710 I/min 5 μm semi-automatic, open without pressure With integrated pressure gauge 0 bar 16 bar -20 °C 50 °C ATEX optional 0.5 bar 10 bar

Lock type	not lockable
Туре	1-part
Hysteresis	0,3 bar
Medium	Compressed air Neutral gases
Medium temperature note	Extended temperature range min./max. (optional) -40 °C 80 °C
Weight	0.45 kg
Material	

Housing material	Aluminum
Seal material	Nitrile butadiene rubber
Material front plate	Polyamide
Material filter insert	Sintered bronze
Material condensate drain	Plastic
Part No.	G651APBK1GA00HN

#### **Technical information**

Max. achievable compressed air class acc. to ISO 8573-1:2010 5 : 8 : 4 (5  $\mu$ m filter porosity) und 6 : 8 : 4 (25 $\mu$ m filter porosity)

Other filter porosities on request.

Nominal flow Qn at p1= 10 bar, p2= 6,3 bar and  $\Delta p$  = 1 bar

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

### Dimensions

To remove the reservoir, allow a clearance of [[60] mm] from the bottom of the reservoir drain. \*Variable dimension based on the type of drain specified, if an automatic drain is specified, add another [[5] mm] to the "J" dimension.
