Compact cylinder, Series CCI-SC

R452000653

General series information AVENTICS Serie CCI-SC Stopper Compact Cylinders

■ Pneumatic cylinders with reinforced piston rod, featuring high resistance to shocks and radial loads. Typically used in conveyor belts and other special machinery, to allow stopping loads smoothly and safely, up to 90Kg weight. Mounting holes dimensions are compatible with ISO 21287.

Technical data

Industry Industrial

Standards Based on ISO 21287

Piston Ø 32 mm Stroke 25 mm Ports G 1/8

Functional principle Double-acting
Cushioning Elastic cushioning
Magnetic piston Piston with magnet

Cylinder special features Roller version

non-rotating
Pressure for determining piston forces 6,3 bar

Retracting piston force 309 N
Extracting piston force 507 N
Min. ambient temperature -20 °C
Max. ambient temperature 80 °C

Working pressure min.

Working pressure max

10 bar

Spring force max.

35 N

Max. permissible radial bearing load

Max. permissible radial bearing load F during

420 N

switching operation

Medium Compressed air

Min. medium temperature -20 °C Max. medium temperature 80 °C Max. particle size 50 μ m Oil content of compressed air max. 5 mg/m³

Material

Piston rod Stainless Steel

Material, front cover Aluminum

Cylinder tube Aluminum

End cover Aluminum

Part No. R452000653

Technical information

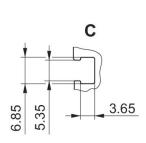

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

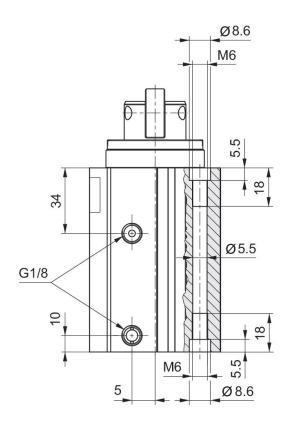

The oil content of compressed air must remain constant during the life cycle.

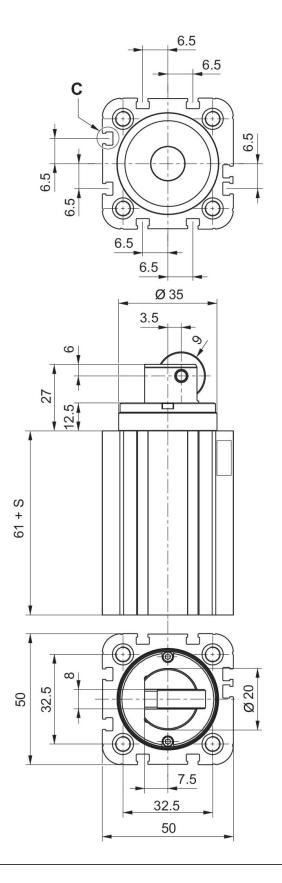

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

Dimensions in mm

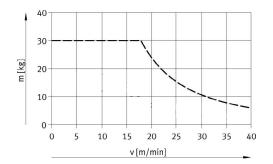

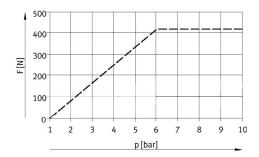

S = stroke

Maximum permissible moving mass depending on the impact speed Ø 32 mm Roller version

Max. permissible radial bearing load F during switching operation Ø 32 mm Roller version
