Compact cylinder, Series KPZ-SC R452000684

General series information Compact cylinder, Series KPZ-SC

Pneumatic cylinders with reinforced piston rod, featuring high resistance to shocks and radial loads. Typically used in conveyor belts and other special machinery, to allow stopping loads smoothly and safely, up to 90Kg weight. Mounting holes dimensions are compatible with NFE 49-004.

Technical data

Industry Standards Piston Ø Stroke Ports **Functional principle** Cushioning Magnetic piston Cylinder special features Pressure for determining piston forces Retracting piston force Extracting piston force Min. ambient temperature Max. ambient temperature Working pressure min. Working pressure max

Industrial Based on NFE 49004 32 mm 20 mm G 1/8 Single-acting, extended without pressure Elastic cushioning Piston with magnet Axle pivot version 6,3 bar 309 N 507 N -20 °C 30 °C 2 bar 10 bar

Spring force max.	35 N
Max. permissible radial bearing load	3270 N
Max. permissible radial bearing load F during switching operation	570 N
Medium	Compressed air
Min. medium temperature	-20 °C
Max. medium temperature	80 °C
Max. particle size	50 µm
Oil content of compressed air max.	5 mg/m³

Material

Piston rod	Stainless Steel
Material, front cover	Aluminum
Cylinder tube	Aluminum
End cover	Aluminum
Part No.	R452000684

Technical information

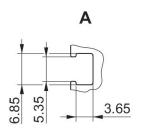

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

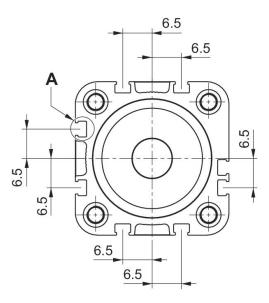

The oil content of compressed air must remain constant during the life cycle.

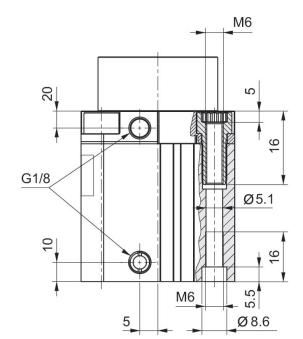

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

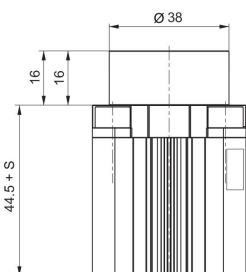

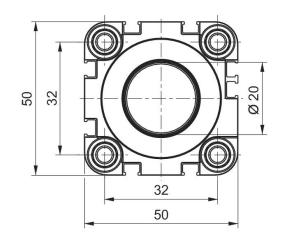

Dimensions in mm

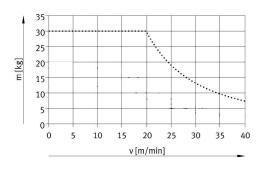

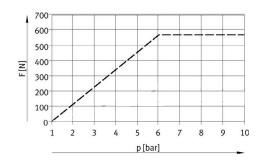

Maximum permissible moving mass depending on the impact speed Ø 32 mm Axle pivot version

Max. permissible radial bearing load F during switching operation
