## AVENTICS Series PRA Profile cylinders (ISO 15552)

The AVENTICS Series PRA (ISO 15552) cylinders have a compact design profile with integrated sensor slots. The Series PRA (ISO 15552) cylinders can be used for all industries. This includes general automation technology, machine and systems construction, as well as specific industry applications.

## Technical data

|                                        |                                    |
|----------------------------------------|------------------------------------|
| Industry                               | Industrial                         |
| Piston Ø                               | 50 mm                              |
| Stroke                                 | 50.8 mm                            |
| Ports                                  | 1/4 NPT                            |

|                                    |                |
|------------------------------------|----------------|
| Cushioning length                  | 17 mm          |
| Cushioning energy                  | 15 J           |
| Weight 0 mm stroke                 | 1.34 kg        |
| Weight +10 mm stroke               | 0.072 kg       |
| Stroke max.                        | 2100 mm        |
| Medium                             | Compressed air |
| Min. medium temperature            | -20 °C         |
| Max. medium temperature            | 80 °C          |
| Max. particle size                 | 50 µm          |
| Min. oil content of compressed air | 0 mg/m³        |
| Max. oil content of compressed air | 5 mg/m³        |

## Material

|                       |                      |
|-----------------------|----------------------|
| Piston rod            | Stainless Steel      |
| Scraper material      | Polyurethane         |
| Seal material         | Polyurethane         |
| Material, front cover | Die-cast aluminum    |
| Cylinder tube         | Aluminum             |
| End cover             | Die-cast aluminum    |
| Nut for piston rod    | Steel, chrome-plated |
| Part No.              | R480176341           |

## Technical information

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

## Cushioning diagram

$v_t$  = Piston velocity [m/s]  $m$  = Cushionable mass [kg]
